

GÖKBERK SARI

FULL STACK DEVELOPER

İzmir, Turkey | gokberksarihr@gmail.com | www.github.com/gkberksari | www.linkedin/in/gokberksari

I'm a full-stack developer passionate about building modern, scalable web applications. I love tackling complex problems, experimenting with AI-driven solutions, and working across the stack — from intuitive front-end design to robust back-end architecture. Curiosity and continuous learning drive me to create impactful digital products.

AREA OF EXPERTISE

Frontend: React.js, Material UI, shadcn, Next.js	Backend: Node.js, Express.js, Typescript Rest API, GraphQL API	Database: PostgreSQL Prisma ORM DevOps: Docker, Amazon Web Service English: Proficient
---	--	--

PROJECTS

Google Looker Studio Dashboard

- Built a Google Looker Studio dashboard by processing raw data from RevenueCat & Adapty via BigQuery.
- Integrated Google Ads to display net profit, ROAS, ROI, cohort and LTV insights.

kurutmadunyasi.com.tr

- Designed and launched a promotional website using drag-and-drop tools.
- Learned fundamentals of web design, navigation, and forms.

Yaşar Chatbot

- Developed a university chatbot answering FAQs using fuzzy matching & caching strategies.
- Gained experience in AI training, response handling, and UI design.

Word Bank School Project

- Developed a full-stack multiplayer word game using HTML, CSS, Javascript Bootstrap and React. Implemented real-time gameplay functionality using Socket.io Created user management system with MySQL database integration Designed MVC, responsive user interface
